

PRODUCT DATA SHEET

Oilzum Form Oil

Oilzum Form Oil is a light viscosity form oil designed for use as a release agent on forms involved in concrete pouring operations. It is a blend of quality pure paraffinic base oil and petroleum distillate.

Oilzum Form Oil's viscosity allows it to be sprayed or brushed on a form. A fatty material added to the formula reacts with the alkali in the cement to form a barrier between the form and the cement. This ensures easy separation and leaves a smooth concrete surface.

Oilzum Form Oil has excellent surface wetting ability allowing complete oil coverage on all forms, protects against rusting of metal forms, and will not stain the concrete.

TYPICAL PROPERTIES	Method	Form Oil
Kinematic Viscosity @40°C cSt	ASTM D445	2.5
Density @15°C lbs/gal	ASTM D4502	6.9
Flash Point (COC) °C	ASTM D92	70
Pour Point °C	ASTM D97	-8

Oilzum products have exceeded the needs of auto enthusiasts and champion racers since 1905!
