Oilzum Morkut NC

MOR KUT NC is a Non Chlorinated heavy duty cutting oil developed for difficult to machine ferrous alloys. It is a mixture of traditional additives, lubricity components, and proprietary chlorine replacement chemistry derived from vegetable oil. These high performance ingredients are blended into a high quality base stock.

MOR KUT NC is designed for the most demanding metal removal applications. It is particularly well suited to the machining of stainless steels and the specialty high-strength alloys. It contains inactive sulfur, and therefore can also be used on copper and its alloys. It can be used in many machining applications including tapping, thread cutting, form grinding, drilling, and turning.

<u>Test Description</u>	<u>Test Method</u>	<u>Units</u>	<u>Value</u>
Viscosity @ 40°C	ASTM D445	cSt	49
Chlorine			NO
Inactive Sulfur			YES
Active Sulfur			NO
Fat		V%	7%
Flash, COC	ASTM D92	°C	202
Copper Corrosive Test	ASTM D130		1B

Revised 2/16
